

For universities and colleges ↘

Your university's digital assessments partner.

Gamified quizzing, measurable learning, internal quizzes and proctored exams, set up around your courses in 30 days.

Classrooms that play

Live quizzes students answer on their own phones.

Reports on who learnt what

By student, class, batch and department.

Evidence for NEP and NAAC

Every internal test recorded against your outcomes.

What you get back →

One platform for every quiz, test and report on campus.

Most campuses run lecture polls on one tool, class tests on online forms, marks in spreadsheets and exams somewhere else. Playground brings all of it together, with a login for every faculty member.

Attention in every lecture

Students answer on their phones instead of drifting off on them. Short quizzes during a lecture cut mind-wandering from about 41% to 19%.

Szpunar, Khan & Schacter, PNAS, 2013

Hours back for faculty

Tests mark themselves. Reports are ready the moment time is up, with nothing to tally in a spreadsheet.

Learning you can see

After every quiz you know which student is strong in which course outcome, and who needs help.

Evidence already on file

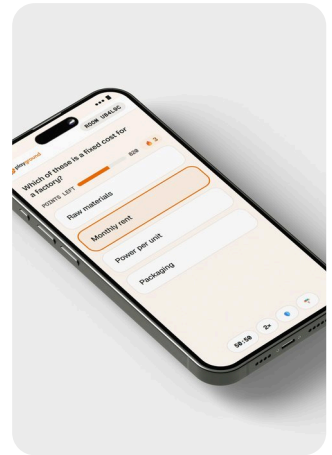

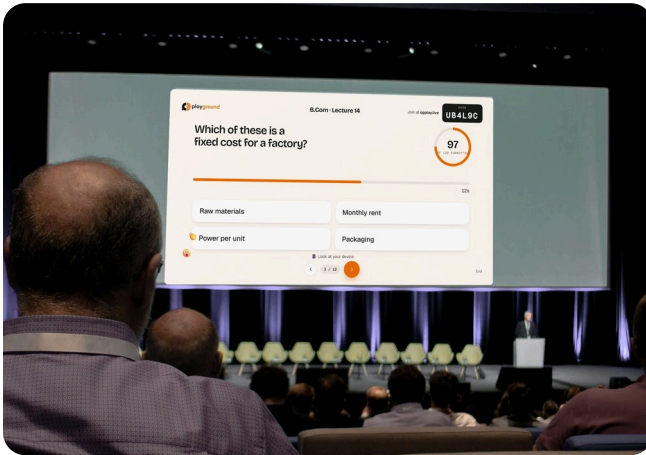

Every internal test becomes a dated record, mapped to outcomes, for your NEP and NAAC reporting.

Replaces | Lecture polls | Online test forms | Mark spreadsheets | Exam software

In the classroom →

A lecture your students play along with.

Put a code on the projector. Students join from their phones in seconds, answer against the clock and watch the leaderboard move. The phone becomes part of the lecture instead of a distraction from it.

When faculty use it

After a unit ends

A short quiz on the chapter just finished. The leaderboard turns revision into a contest.

Before an internal

A practice round, so every student knows where they stand before the real test.

When a topic is new

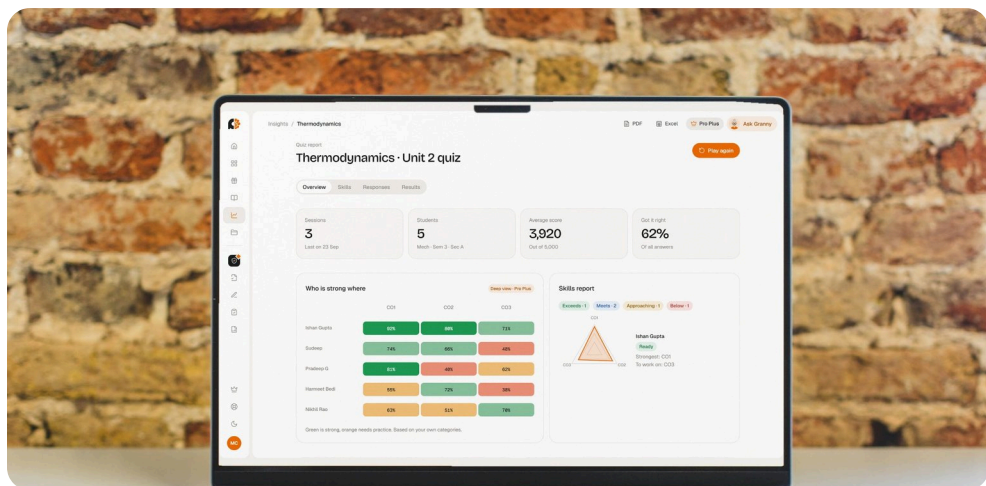

A quick poll or word cloud shows what the class already knows before you begin.

Game mechanics Racing leaderboard | Streaks | Lifelines | Badges | Podium

Measured learning →

Know exactly who learnt what, after every class.

Every question is tagged to an outcome, so every quiz tells you, student by student, which outcomes are secure and which need another pass.

Advanced learners

Exceeds

Strong on every outcome. Give them stretch problems, research work or the next competition.

On track

Meets

Keep them sharp with a short quiz each week. Nothing extra needed.

Need mentoring

Below

Weak on one or more outcomes. Book extra classes or a mentor, with the exact topics to cover.

Download any report in one click.

One student, one class, one batch or a whole department, ready to print or share.

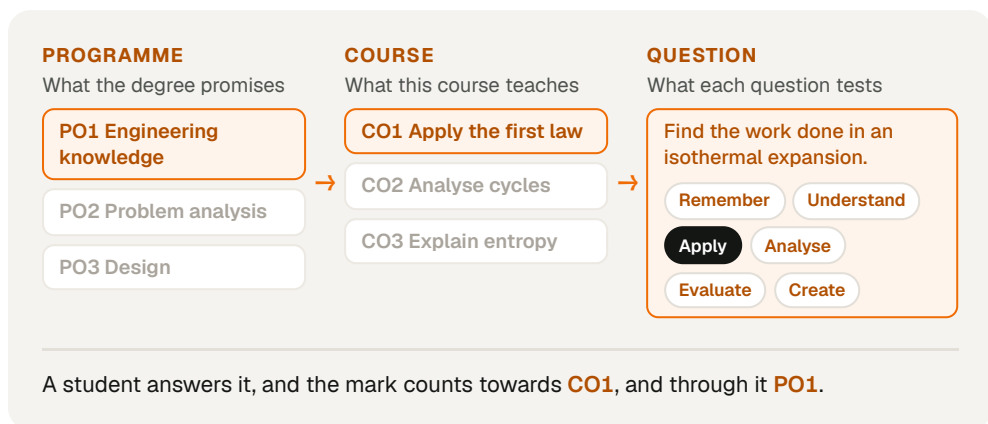

PDF

Excel

Built for your courses →

Ready on day one: quizzes mapped to your syllabus.

Before your faculty log in, we build their question banks from your course objectives and programme outcomes. Every question carries its outcome and its level of thinking.

Every faculty member

Their own login, their own classes, quizzes ready to run and reports a click away.

Deans and IQAC

An admin dashboard that rolls everything up by class, batch, department and the whole university.

Set up by our team during your first 30 days, calibrated to the courses you teach in each class.

NEP 2020 and NAAC →

The evidence NEP and NAAC ask for, produced while you teach.

NEP 2020¹

Para 12.2

Universities are to move away from one high-stakes exam towards continuous, comprehensive evaluation, graded against learning outcomes.

With Playground: Every quiz and class test is a continuous-evaluation record, scored against your outcomes.

NEP 2020¹

Paras 24.3 and 24.4(c)

Digital learning should blend with activity and give teachers tools to follow each learner's progress.

With Playground: Gamified live quizzes in class, with a progress report for every learner.

NAAC

Criterion 2

Teaching, learning and evaluation, including how well course outcomes are attained.

With Playground: Course-outcome attainment for each internal test, ready to export for your SSR and AQAR.

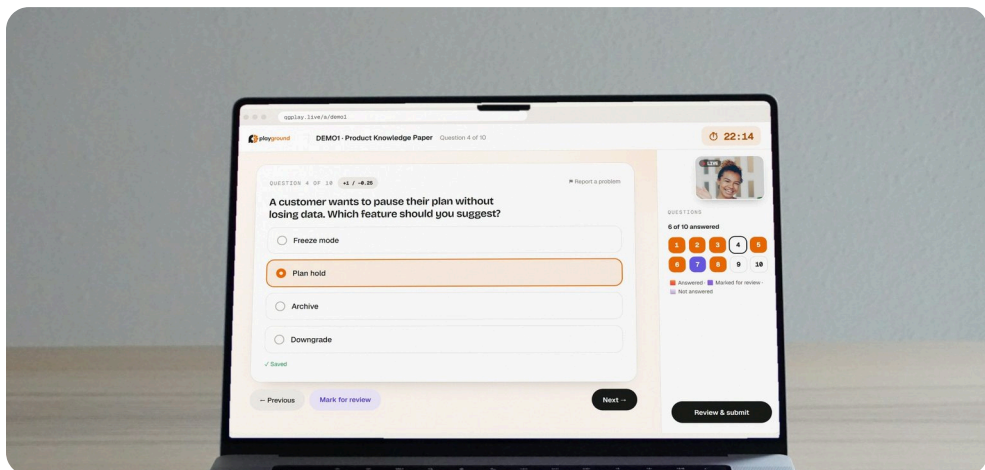

No platform can promise a NAAC grade, and we won't. What we promise is that your Criterion 2 evidence is complete, consistent across every faculty member, and one download away.

¹ National Education Policy 2020, Ministry of Human Resource Development, Government of India: para 12.2 (p. 38); paras 24.3 and 24.4(c) (pp. 58–59). Summarised, not quoted. Full text at education.gov.in.

Assessments →

From a five-minute class quiz to a proctored entrance exam.

One platform for every kind of internal assessment, so students, faculty and results stay in one place.

- **Class tests** Scheduled windows, negative marking, and marks the moment time is up.
- **Internal assessments** A different paper for every student, drawn from your bank by topic and difficulty, with tab-switch checks.
- **Proctored exams** AI watches camera, mic and screen for entrance, certification and placement-readiness tests. Every flag comes with evidence, and your team makes the call.
- **Results** One private link. Each student sees only their own marks, rank and question-by-question score.

How we start →

Live in 30 days. Every faculty member trained in person.

Week 1

Map your courses

We sit with your IQAC and HoDs to list courses, outcomes and how each is assessed.

Week 2

Build the question banks

Our team writes and tags quizzes for every course, ready to run.

Week 3

Logins and dashboards

Faculty accounts, the admin roll-up, and a pilot in one department.

Week 4

Train every faculty member

Demos and hands-on sessions on campus. Then you go live.

One partner instead of four tools. Classes that hold attention, reports that show who needs help, and a full semester of NEP and NAAC evidence you never had to compile by hand.
